CODEBASICS' STORY

In 2016, **Dhaval Patel,** the founder of Codebasics, created the **'Codebasics' YouTube channel** to share his knowledge as a means to gain mental peace during a significant health struggle. He discovered his passion for teaching and realised his unique ability to simplify complex topics. The love and blessings from thousands of students started to heal his health issues. This transformative experience soon became his life's purpose and even led him to consider leaving his lucrative job at Bloomberg, New York.

In 2020, one of Dhaval's subscribers, **Hemanand Vadivel, a data analytics expert** working in Europe, wished to contribute to the Codebasics' community as a 'payback' for what he learned from the Codebasics channel. In 2021, Hemanand began creating impactful videos for Codebasics, and it helped him heal from the trauma of losing family members to Covid-19. Seeing their shared values, Dhaval proposed a collaboration: creating the best, most affordable Power BI course on the planet.

JUNE 2022

After six months of dedicated collaboration, they released the Power BI course in June 2022, which was met with overwhelming positivity. By this time, both Dhaval and Hemanand had already left their high-paying jobs to create 'Codebasics' as a full-time learning tech company. They made this decision after discovering their 'Ikigai', their true purpose: to make a meaningful impact through education, without any gimmicks.

In the era of commoditized education, where millions of courses are offered for profit but lack true value, Dhaval and Hemanand prioritized providing authentic, job-relevant learning experiences with honest pricing. Besides job-related affordable courses, Codebasics offers high-quality free content and conducts several initiatives to support aspirants including mothers returning to work. This embodies their core vision of providing authentic job-related learning experiences to everyone, irrespective of their financial condition.

JAN 2025

Codebasics has more than

1 Million+ learners

in their community and strongly marching forward with a vision to unleash at least

5 Million+ potentials by 2026.

YOUR TEACHERS ARE INDUSTRY EXPERTS

Dhaval Patel

Data Entrepreneur (13+ Years),
YouTuber,
Ex - Bloomberg, NVIDIA

I have 18 years of experience in Programming and Data Science working for big tech companies like NVIDIA and Bloomberg. I also run a famous YouTube channel called Codebasics where I pursue my passion for teaching.

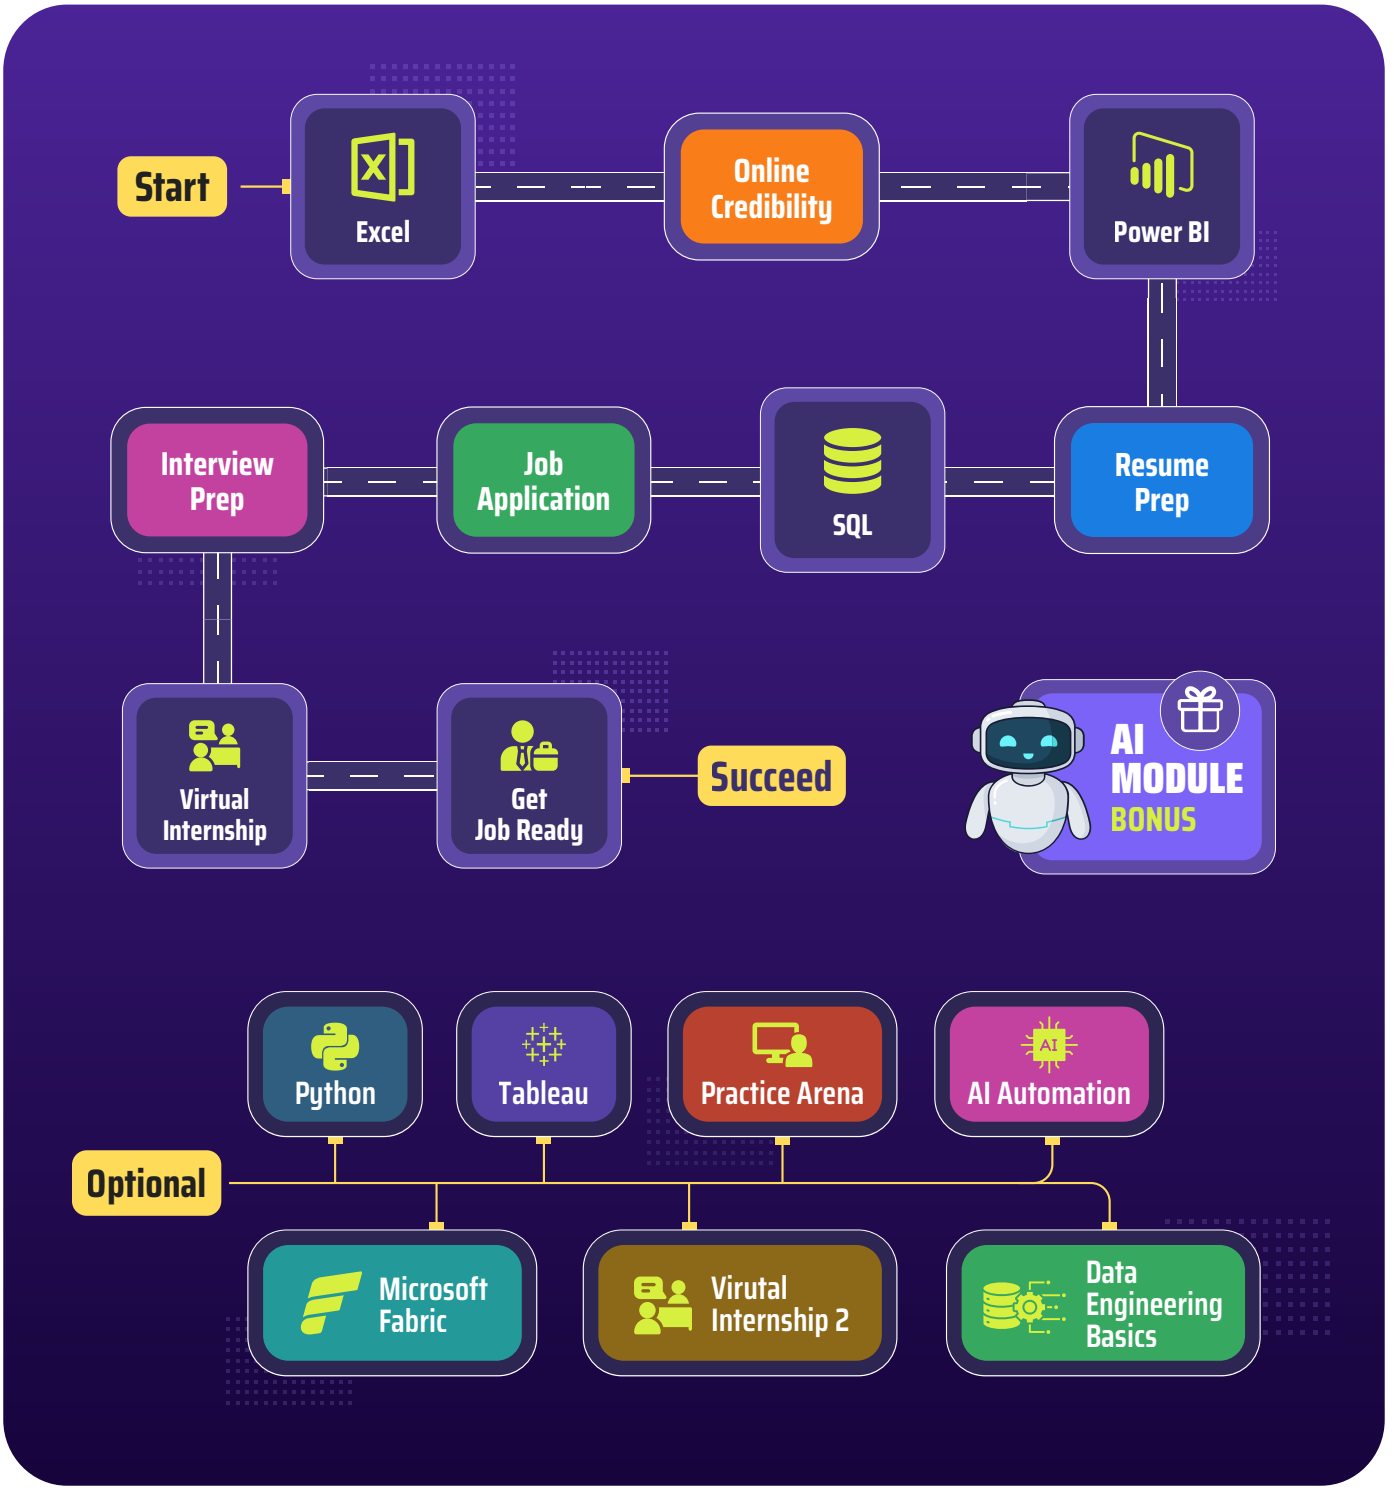
Hemanand Vadivel

Ex- Data Analytics Manager,
8+ Years in Europe, Microsoft Certified,
Certified Supply Chain Professional

I'm a Mechanical Engineer who transitioned to a full-time Data & Analytics Manager in the UK & Germany. I have delivered 30+ analytics projects over 15+ countries and trained professionals at different levels to equip them with valuable analytics skills.

DATA ANALYTICS BOOTCAMP 5.0

JOB ASSISTANCE | AI PROJECTS | DATA ENGINEERING BASICS



WHY THIS IS THE MOST EFFECTIVE BOOTCAMP ON THIS PLANET

- We respect both your time and money. Hence, we recommend you take our short **Data Analyst Survey** before enrolling in our Bootcamp.
- We offer unlimited chat support for doubt clearing through discord.
- The projects you will be working on will be related to FMCG, Hospitality, including Finance, Sales, and Supply Chain Analytics and more will be added in the future.
- We provide comprehensive practical job assistance that includes: Resume and Interview Preparation, Virtual Internships, Interview Playbook, Mock Interviews and Building Online Credibility.
- You will experience highly engaging content that provides a cinematic feel, real-world business practice problems, and interactive business meetings.
- In this bootcamp, you won't be working on toy datasets. Instead, you'll tackle complex datasets used by real companies, with millions of records.
- 100% refund within 30 days and pay the difference feature.

Scan the QR Code

to start the survey!

WHAT'S NEW IN DATA ANALYST BOOTCAMP 5.0?

- Data Engineering Basics for Data Analysts module so that you can stay ahead in the competitive job market.
- 6 AI Automation Workflows for Analysts with real business projects that prepare you for the AI-driven era.
- LinkedIn Optimizer with AI that can review your profile and suggest corrections to make your profile noticable to recruiters.
- Upgraded Resume Builder that can give you recommendations to make sure it passes ATS (Applicant Tracking Systems).
- Enhanced job placement features that help you build your career with the help of a dedicated talent management team.

EXCEL

MOTHER OF BUSINESS INTELLIGENCE

Beginners to Advanced course for those who are preparing for a data career (especially Data Analysts). This course is carefully curated by industry experts to **mimic real-world scenarios** that prepare you to become a market fit. You will also get practical exercises to practice and get a **simulated experience of a data analyst** using excel to solve problems.

9400+ Learners | **4.9** Rating

SYLLABUS

- Excel introduction
- Formulas
- Tables
- Charts
- Essential features
- Cleaning bad data
- Combining data with VLOOKUP, INDEX MATCH, XLOOKUP
- Basic Maths and Statistics
- Commonly Used Business Metrics (P & L)
- Mean, Median, Mode
- Variance, Standard Deviation
- Correlation
- Merging Data
- Adding New Columns
- Loading Power Query Data to Excel
- Report creation
- Pivot Table options and formatting
- Power Pivot and DAX
- Data modeling
- Conditional formatting
- Basics of VBA
- ETL (Extract, Transform & Load Data)
- Functional Knowledge: Sales
- User Empathetic Report Design
- Sales Analytics

POWER BI 3.0 WITH FABRIC

GET JOB READY: POWER BI DATA ANALYTICS FOR ALL LEVELS

A practical beginner's course that will prepare you for the Data Analyst, Business Analyst, or Power BI Developer job market through a **true end-to-end Power BI** project carefully curated to provide you with r**eal organizational experience,** business context, and now, exclusive Microsoft Fabric integration to advance your analytics journey.

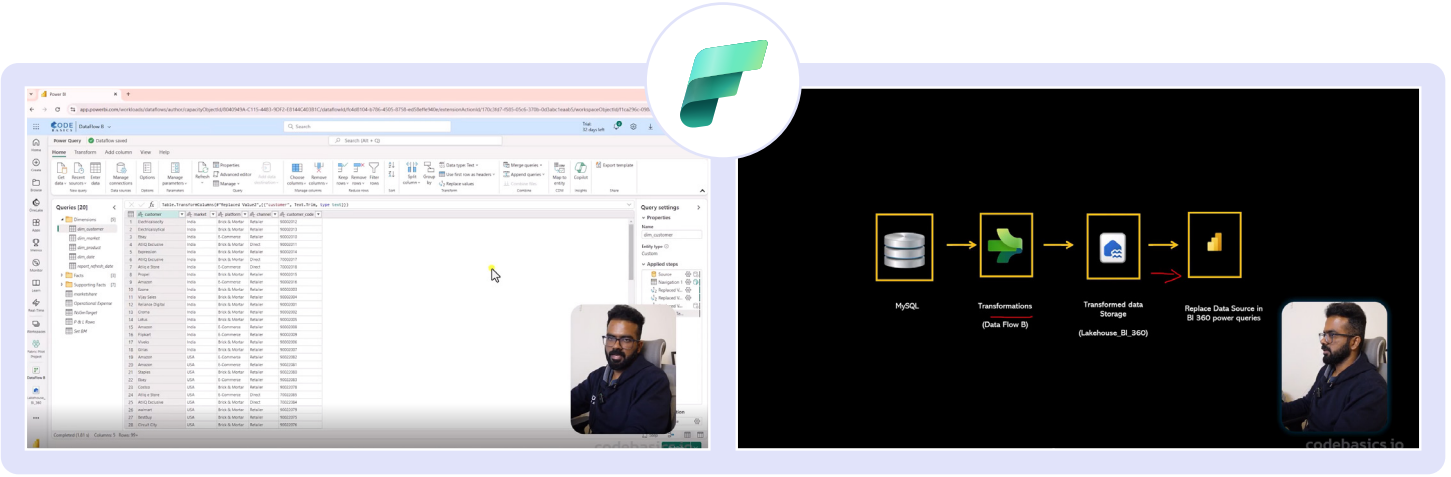
6900+ Learners | **4.9** Rating

SYLLABUS

- What is Power BI 3.0
- Basics of Power Query
- Simplified: Profit and Loss Statement
- Data Warehouse, OLTP vs OLAP, Data Catalog
- Data Exploration
- Fact vs Dimension Tables
- Review Finance View Mockups
- Transform Data in Power Query Editor
- Create Calculated Columns in Power Query Editor
- Power Query Best Practices
- Basics to Advanced DAX
- M language
- Data Visualisation – Basic to Advanced Charts
- Filter, Slicer, Bookmarks
- Interview Preparation Checklist
- Toggle Button, Tooltip
- Data Modelling: Star and Snowflake Schema
- Report Optimization using DAX Studio
- Build Finance View
- Build Sales, Marketing & Supply Chain View
- Build Key Measures,Calculated Columns
- 15 Design Rules for an Effective Dashboard
- User Acceptance Test Report
- Power BI Service Overview, Report Sharing, and Apps
- Set Up Automatic Data Refresh
- Project Portfolio for Your Resume
- Resume Writing Tips
- Job Application Tips
- Interview Tips
- Tasks based on Power BI monthly updates

MICROSOFT FABRIC MINI COURSE

Learn how to use Microsoft Fabric to advance your data analytics workflow. This module builds on your Power BI knowledge and includes a real-time Pilot Project demo to help you understand Microsoft Fabric more effectively.



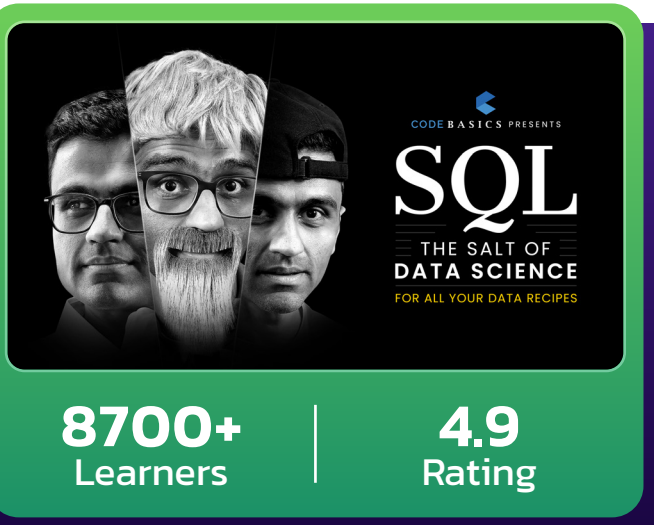
SYLLABUS

- Overview of Microsoft Fabric: Key Offerings and Capabilities
- Essential Knowledge for Data Analysts in Microsoft Fabric
- **Data Storage Options:**
  OLTP and SQL Databases
  OLAP: Lakehouse, Warehouse, and Eventhouse
- Data Transformation: Using Dataflow Gen2
- Data Orchestration: Setting Up Refresh Pipelines
- Migrating Power BI Reports to Microsoft Fabric

SQL

BEGINNER TO ADVANCED FOR DATA PROFESSIONALS

Beginners to advanced course for those preparing for a data career (data analyst, data scientist, or data engineer). This course is carefully curated to **simulate real-time organizational** experience to prepare you for the current job market and at the same time provides you with an ultimate learning experience through a **storytelling mode** that you would see in movies.



8700+ Learners | **4.9** Rating

SYLLABUS

- ☑ Install MySQL: Windows
- ☑ Install MySQL: Linux, Mac
- ☑ Retrieve Data Using Text Query (SELECT, WHERE, DISTINCT, LIKE)
- ☑ Retrieve Data Using Numeric Query (BETWEEN, IN, ORDER BY, LIMIT, OFFSET)
- ☑ Summary Analytics (MIN, MAX, AVG, GROUP BY)
- ☑ HAVING Clause
- ☑ Calculated Columns (IF, CASE, YEAR, CURYEAR)
- ☑ Joins (INNER, LEFT, RIGHT, FULL,CROSS)
- ☑ Join More Than Two Tables
- ☑ Subqueries
- ☑ ANY, ALL Operators
- ☑ Correlated Subquery
- ☑ Common Table Expression (CTE)
- ☑ CTE Benefits & Other Applications
- ☑ Entity Relationship Diagram (ERD)
- ☑ Database Normalization and Data Integrity
- ☑ Data Types: Numeric (INT, DECIMAL, FLOAT, DOUBLE)
- ☑ Data Types: String (VARCHAR, CHAR, ENUM)
- ☑ Data Types: Date, Time (DATETIME, DATE, TIME, YEAR, TIMESTAMP)
- ☑ Data Types: JSON, Spatial (JSON, GEOMETRY)

- Primary Key
- Foreign Key
- Entity Relationship Diagram – ERD
- INSERT, UPDATE, DELETE Statement
- ETL, Data Warehouse
- OLAP vs OLTP, Data Catalog
- Fact vs Dimension Table
- Star vs Snowflake Schema
- Data Import
- Simplified: What is Kanban?
- User-Defined Functions
- Stored Procedures
- Database Views
- Window Functions OVER Clause,ROW_NUMBER, RANK, DENSE_RANK
- Database Triggers
- Database Events
- User Accounts and Privileges
- Database Indexes

PYTHON

FOR BEGINNER AND INTERMEDIATE LEARNERS

This project-based learning course will teach Python through hands-on experience with two real-world projects: (1) Data analysis in the hospitality domain and (2) Building an expense tracking system. It is designed for both complete beginners with no prior coding experience and those with some Python knowledge looking to enhance their skills. The course is taught by an industry expert with over 14 years of experience at leading tech companies such as Nvidia and Bloomberg.

7200+ Learners | **4.9** Rating

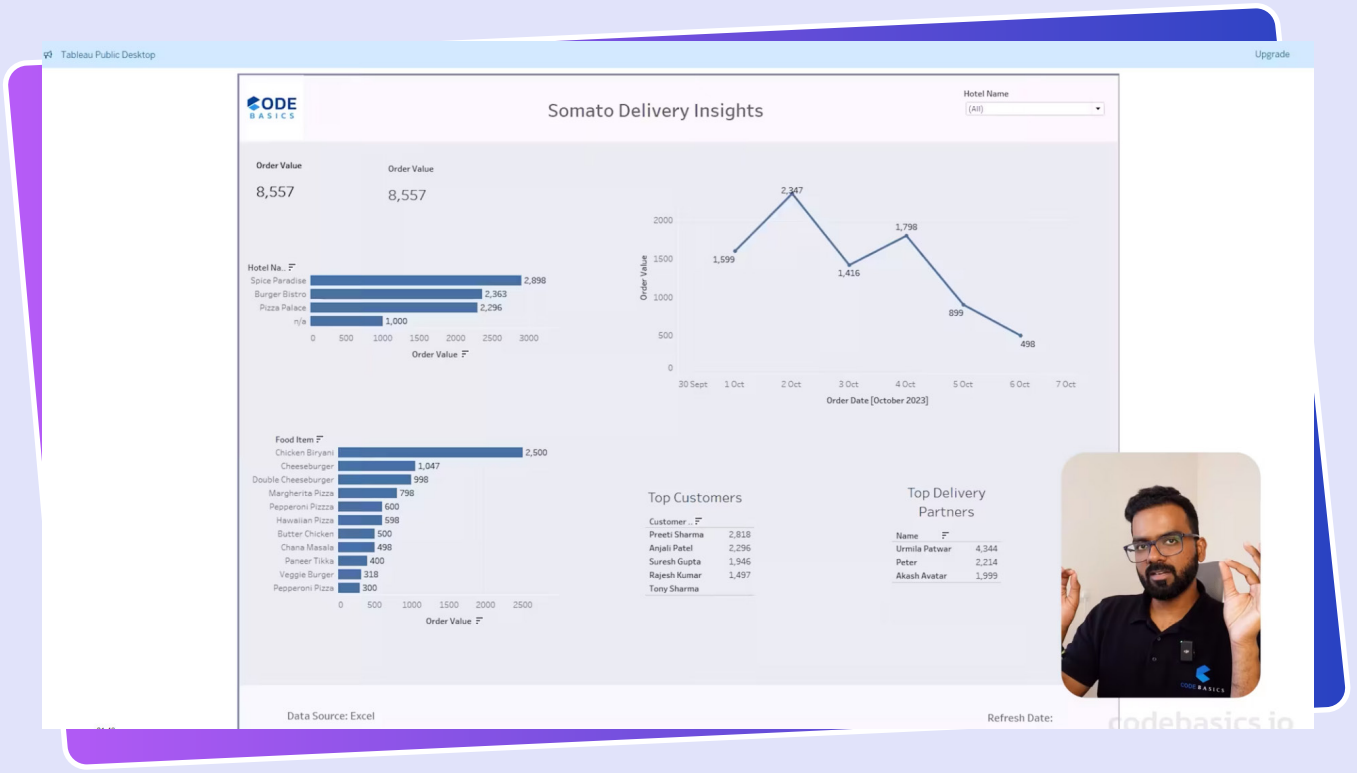
SYLLABUS

- ☑ Python Installation - Windows
- ☑ Python Installation - Linux
- ☑ Python Installation - Mac
- ☑ Variables
- ☑ Numbers
- ☑ Strings
- ☑ Lists
- ☑ Install Pycharm
- ☑ If Condition
- ☑ For Loop
- ☑ Functions
- ☑ Dictionary and Tuples
- ☑ File Handling
- ☑ Classes and Objects
- ☑ Operator Overloading
- ☑ Inheritance
- ☑ Exception Handling
- ☑ Main Function
- ☑ Numpy Introduction and Benefits
- ☑ Basic Operations
- ☑ Matrix Operations
- ☑ Slicing, Stacking
- ☑ Pandas Introduction and Installation

- ☑ Modules and Pip
- ☑ Dataframe Basics
- ☑ Read, Write Excel and CSV Files
- ☑ Handle NA values
- ☑ Group By
- ☑ Concat and Merge
- ☑ Data Visualization Using Matplotlib and Seaborn
- ☑ Data Exploration
- ☑ Data Cleaning
- ☑ Data Transformation
- ☑ Insights Generation
- ☑ Set and Frozenset
- ☑ Lists, Dict and Set Comprehensions
- ☑ Dataframe Basics
- ☑ Code Debugging Using PyCharm
- ☑ Working with JSON
- ☑ Generators and Iterators
- ☑ Decorators
- ☑ API
- ☑ Calling APIs with request Package
- ☑ Building APIs with FastAPI
- ☑ Automated Testing with Pytest
- ☑ Data Validation with Pydantic
- ☑ Database CRUD Operations
- ☑ Streamlit Introduction (Frontend)
- ☑ Analytics: Backend (FastAPI) & Frontend (Streamlit)

TABLEAU MINI COURSE

Boost your chances of getting a job by adding a new skill to your resume with our Tableau Mini Course. Designed for learners who are already familiar with Power BI, this course builds on your existing knowledge to help you learn Tableau using transfer-learning method. This course will guide you through the fundamentals of Tableau, enabling you to expand your data visualization skills seamlessly.



AI FOR DATA ANALYST

Enhance your role as a Data Analyst with our upgraded AI module, tailored to introduce new use cases of AI in your field. Learn how to leverage AI to stand out in your job by applying the latest AI technologies and methods. This module is designed to equip you with the skills needed to integrate AI tools effectively, helping you improve your analysis and make more informed decisions.

By completing this project, you will:

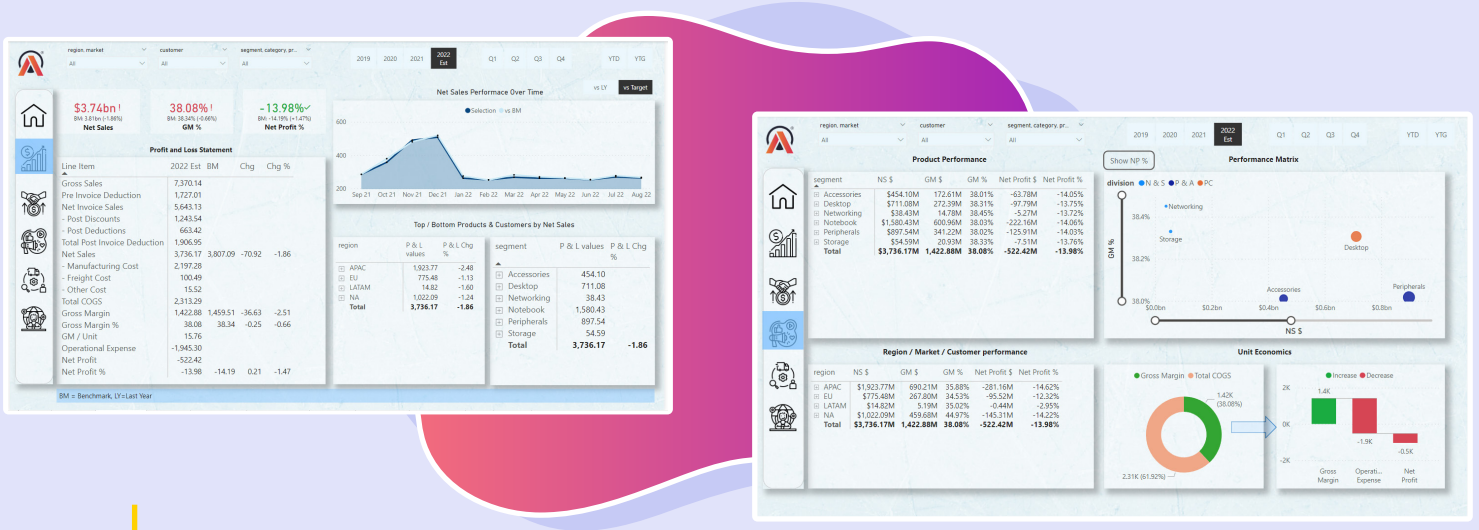
- ☑ Gain domain knowledge by creating Profit and Loss (P&L) reports, evaluating financial performance, and communicating with stakeholders.
- ☑ Develop technical skills in understanding P&L statements, incorporating supplementary data, and optimizing report generation.
- ☑ Understand the importance of finance reports in today's business world, including their role in informed decision-making, financial stability, and strategic planning.

03 BUSINESS INSIGHTS 360 — POWER BI

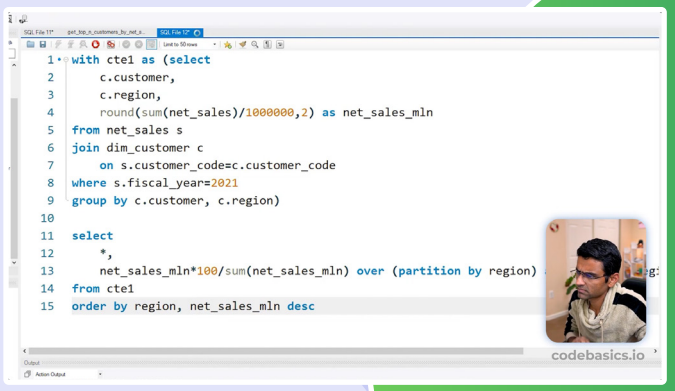


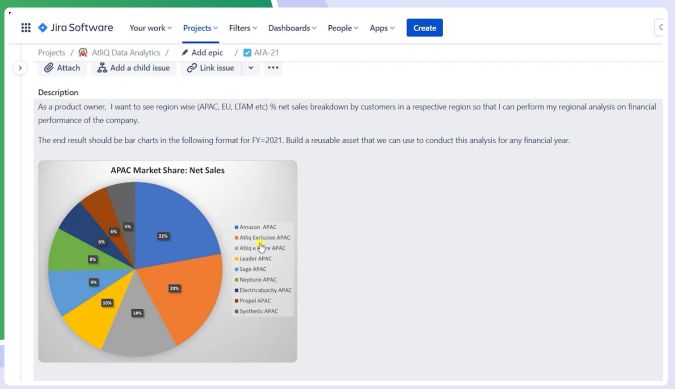
As part of this complex Power BI project, you will immerse yourself in a project environment setup. Taking on the role of "Peter Pandey," you will actively learn and navigate through the project flow, gaining valuable insights and practical experience in Power BI.

By completing this project, you will:

- ☑ Expand your knowledge and understanding of the e-commerce industry, including brick-and-mortar and online retail, as well as key functional areas like finance, sales, marketing, and supply chain management.
- ☑ Gain valuable technical skills in setting up project environments using MURAL, building Power BI dashboards, and utilizing Power BI for data analysis to drive effective decision-making within a company.
- ☑ Acquire real-world experience in using Power BI for data analysis and making informed decisions, which is highly relevant in today's business world where data-driven decision-making is crucial.
- ☑ Develop essential soft skills such as stakeholder management and effective communication, which are vital for success in any business setting.

04 FINANCE AND TOP N INSIGHTS — SQL

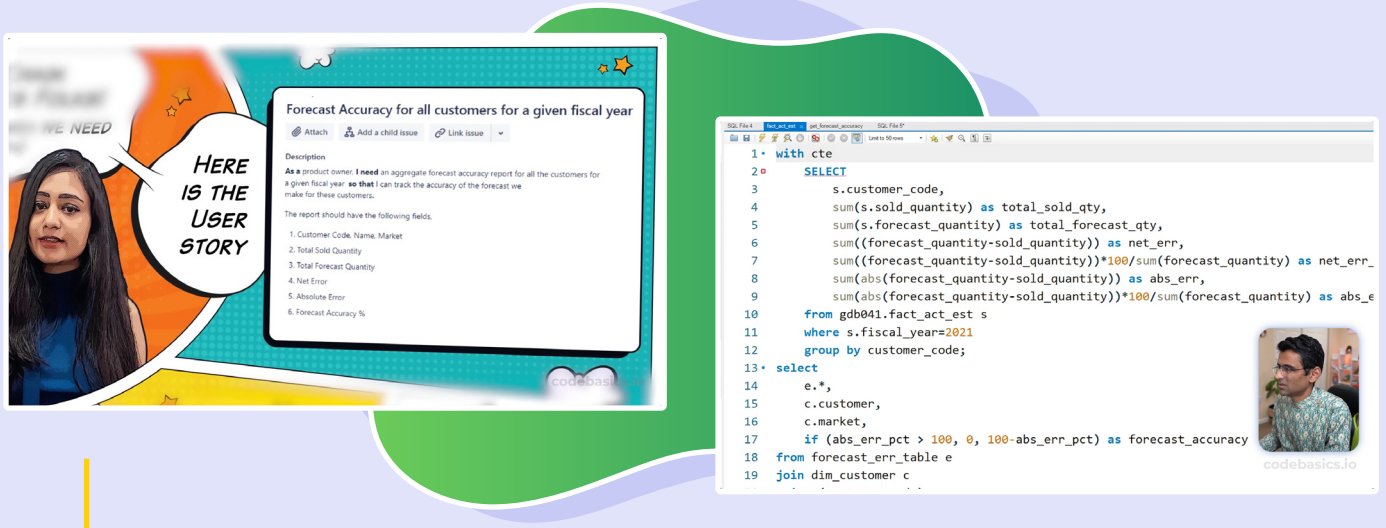




- ☑ Gain domain knowledge in finance analytics for the consumer goods industry, focusing on generating reports for key metrics.
- ☑ Develop technical skills in efficient SQL querying, utilizing User-Defined Functions, creating and executing stored procedures, and leveraging views for data analysis.
- ☑ Understand the significance of data-driven financial decision-making in today's competitive business landscape.
- ☑ Drive sustainable growth by utilizing automated reporting solutions, such as stored procedures, to provide accurate and real-time information for financial analysis and decision-making.

05 SUPPLY CHAIN ANALYTICS AND MODEL OPTIMISATION

SQL

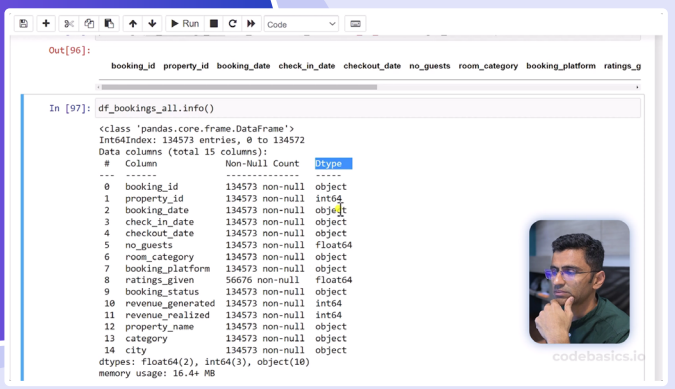


By completing this project, you will:

- ☑ Gain domain knowledge in supply chain analytics for the consumer goods industry, focusing on forecasting errors and absolute error calculation.
- ☑ Develop technical skills in creating helper tables, managing triggers, and optimizing query execution time.
- ☑ Understand the significance of accurate demand forecasting for consumer goods companies and how supply chain analytics can achieve it.
- ☑ Acquire practical experience through hands-on exercises and real-world examples in consumer goods supply chain analytics.

06 HOSPITALITY DOMAIN DATA ANALYSIS

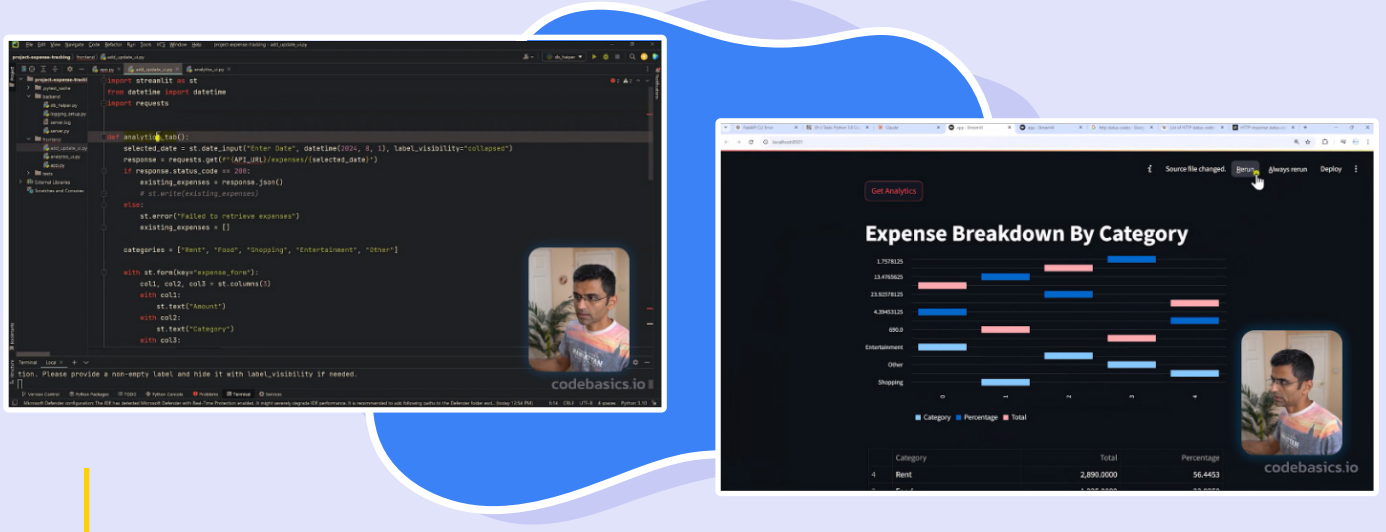
PYTHON



By completing this project, you will:

- ☑ Gain deep domain knowledge in the hotel industry, specifically in data analysis for operations, customer behaviour, revenue management, and market trends.
- ☑ Acquire essential technical skills using Python's Pandas library, including data cleaning, transformation, EDA, statistical analysis, and visualization.
- ☑ Recognize the high relevance of data-driven insights in today's business world for making informed decisions, optimizing operations, and enhancing customer experiences, not just in the hotel industry but across various sectors.

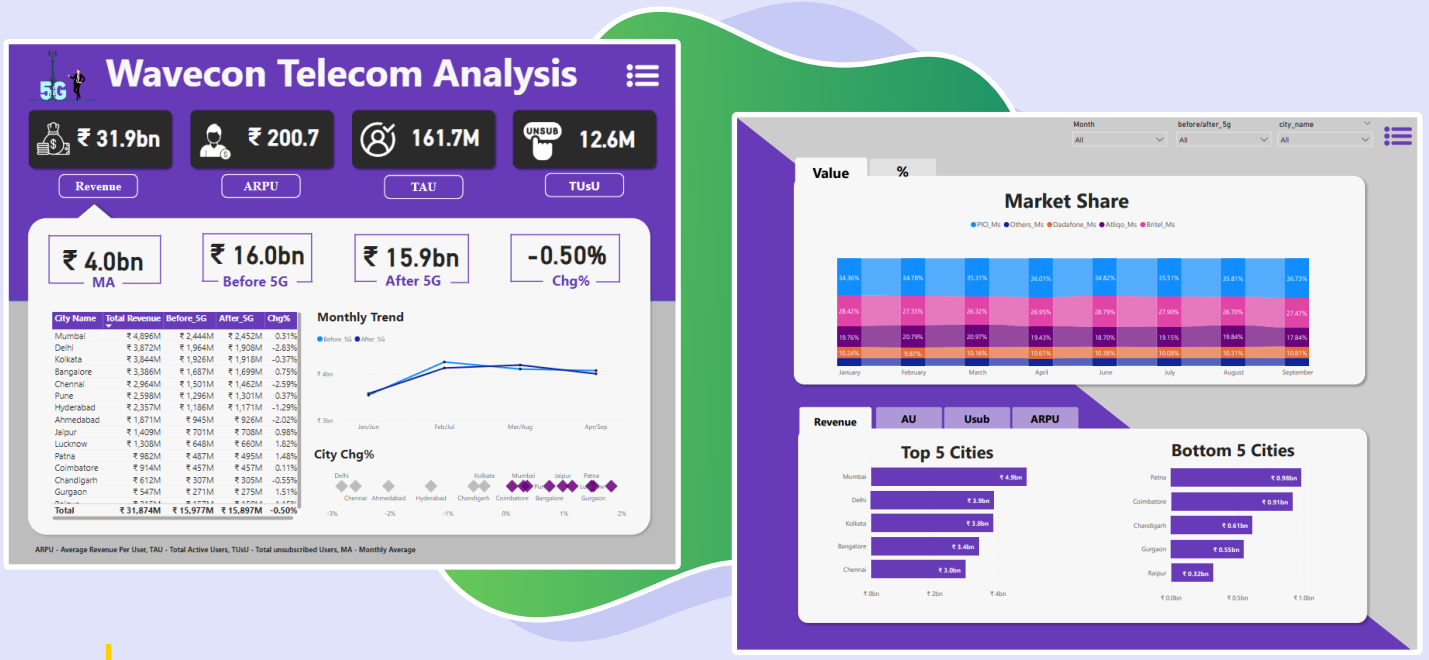
07 EXPENSE TRACKING SYSTEM — PYTHON



By completing this project, you will:

- ☑ Develop practical knowledge of expense management systems by building an application that tracks and analyses day-to-day expenses, such as rent, shopping, and food, providing users with a comprehensive view of their spending habits.
- ☑ Master key technical skills, including Python basics, database interactions with MySQL, backend development using FastAPI, and frontend design using the Streamlit framework, gaining end-to-end application development experience.
- ☑ Understand the value of analytics in financial decision-making by implementing features like category-wise and month-wise expense breakdowns, making this project relevant for aspiring software engineers, data scientists, and data analysts.

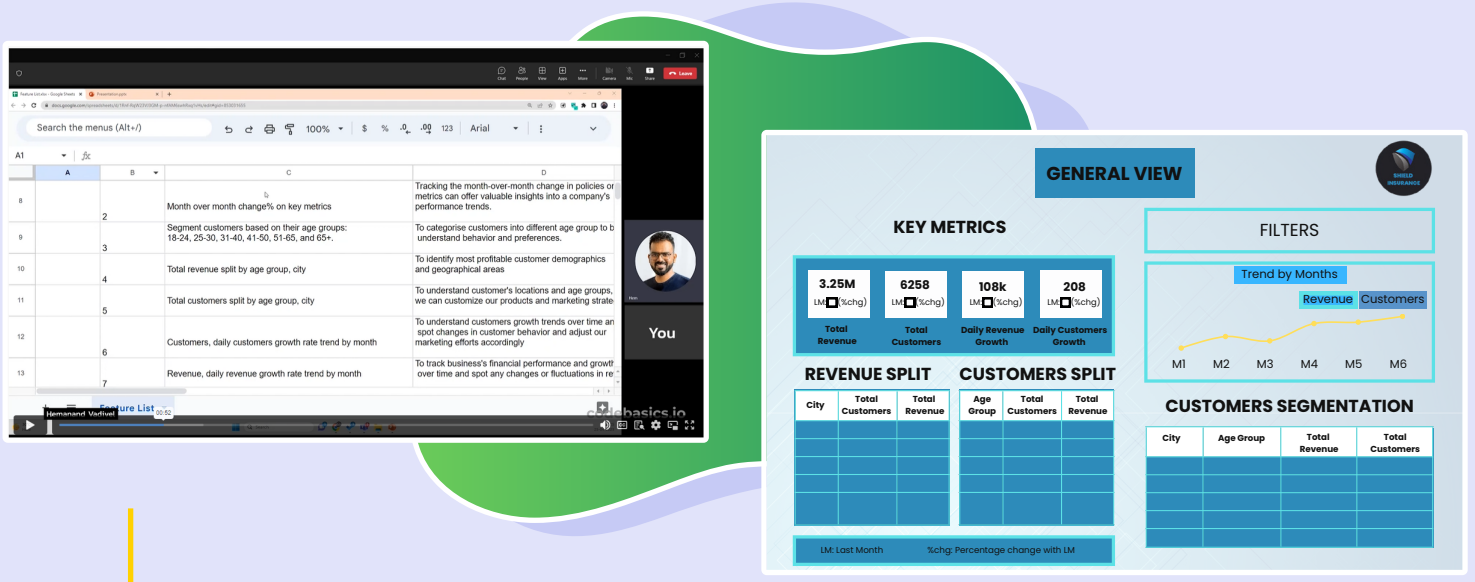
08 TELECOM PROJECT



By completing this project, you will:

- ☑ Acquire domain knowledge in the telecom industry and provide a comparison report of KPIs between pre and post-periods of the 5G launch for an imaginary company "Wavecon".
- ☑ Understand the significance of data analytics in telecommunications sector with a specific focus on crucial metrics such as ARPU (Average Revenue Per User), TAU (Total Active Users), and TUsU (Total Unsubscribed Users).
- ☑ Improve your presentation skills through a mandatory presentation, in which you need to communicate insights to stakeholders and post it on LinkedIn.

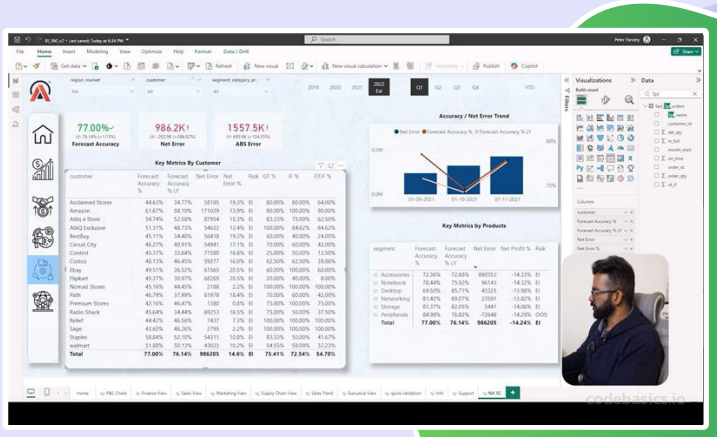
09 INSURANCE PROJECT

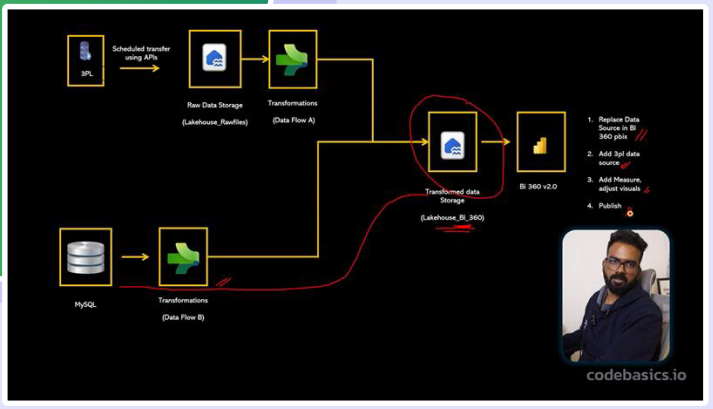


By completing this project, you will:

- ☑ Gain valuable domain knowledge specific to the insurance industry, including insights into challenges, trends, and dynamics.
- ☑ Acquire technical skills tailored to the insurance industry, such as PowerBI dashboarding, data analysis and visualization, DAX, data modelling, and presentation skills.
- ☑ Develop a deep understanding of the growing importance of data analytics in insurance.
- ☑ Meet the increasing demand for risk analysis and management skills.
- ☑ Enhance your ability to understand and personalize customer needs in the insurance industry.
- ☑ Contribute to the success and innovation of insurance companies in today's data-driven business landscape.

10 FABRIC PILOT PROJECT



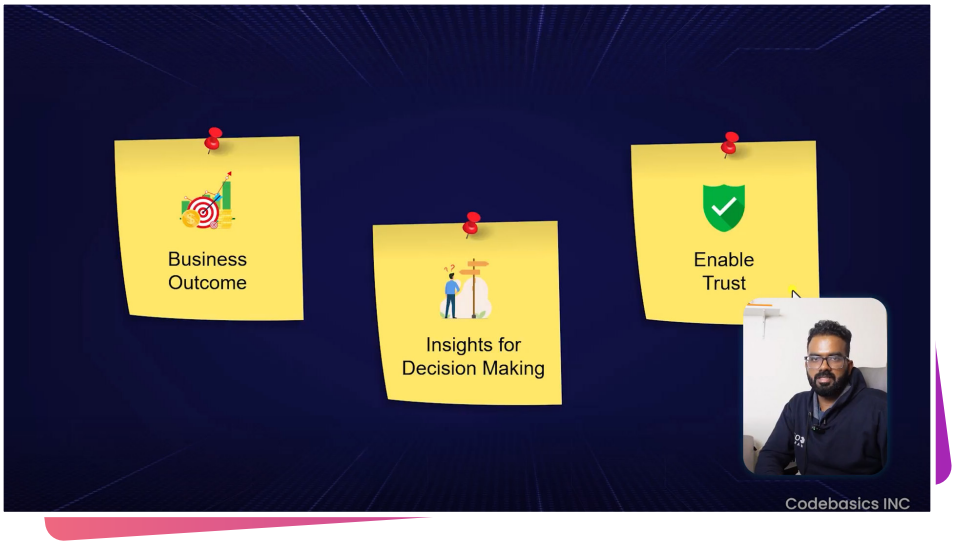


By completing this project, you will:

- ☑ Learn how to migrate your Power BI dashboard to the Microsoft Fabric ecosystem, perform ETL using Dataflow, store your data in Lakehouse or Warehouse (OneLake), and set up pipelines for orchestrating data refresh.
- ☑ Discover the various features of Microsoft Fabric and understand what's essential for you as a Data Analyst.
- ☑ Develop a deep understanding of the growing importance of data analytics in insurance.

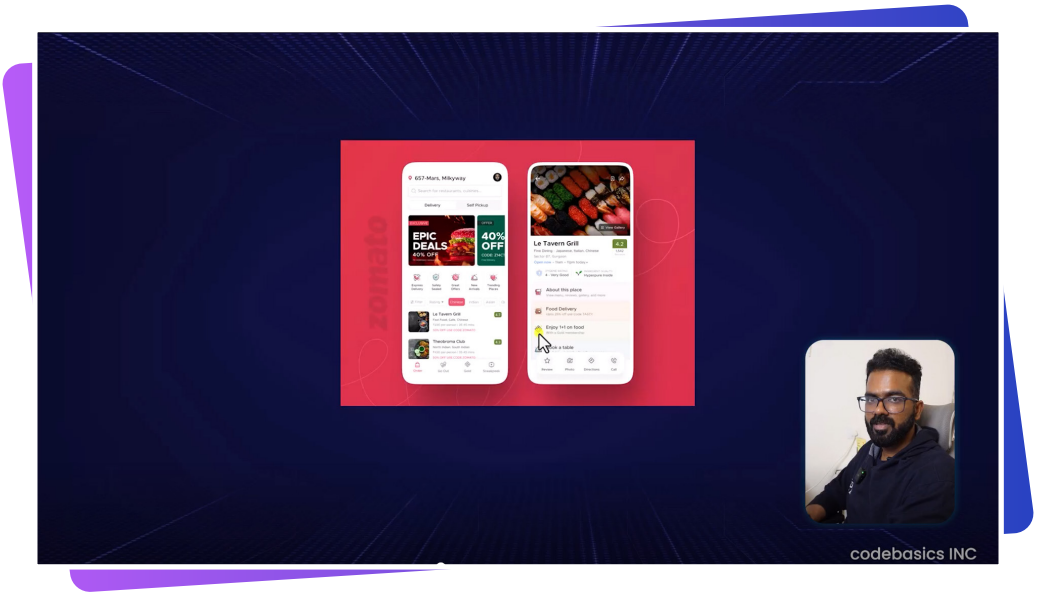
PRESENTATION SKILLS + STAKEHOLDER MANAGEMENT

Mastering presentation skills is key to communicating insights effectively. This module focuses on how to structure and deliver clear, impactful presentations, whether you're addressing team members, clients, or leadership. Learn techniques to simplify complex data, engage your audience, and convey your message with confidence.



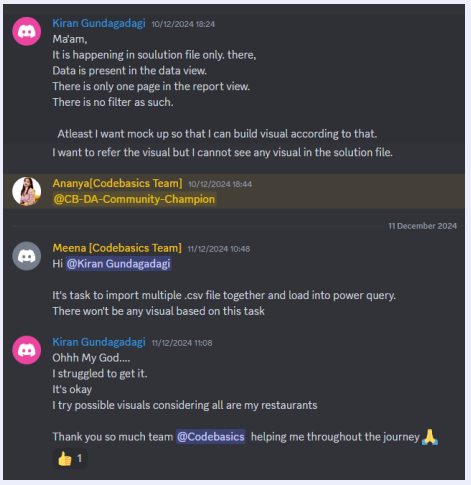
DOMAIN KNOWLEDGE

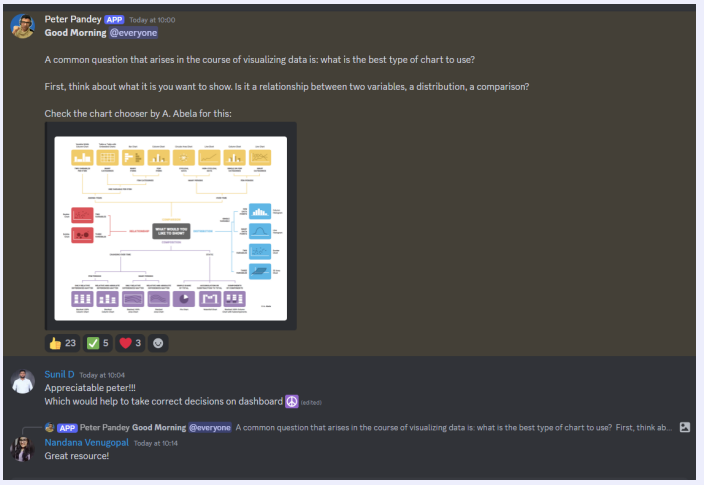
Domain knowledge is essential for interpreting data effectively and delivering insights that align with business objectives. This module focuses on understanding key performance indicators (KPIs) and provides practical resources to help you build expertise in various domains and functions, ensuring you are ready for real-world challenges.



DAILY DISCORD CHAT SUPPORT

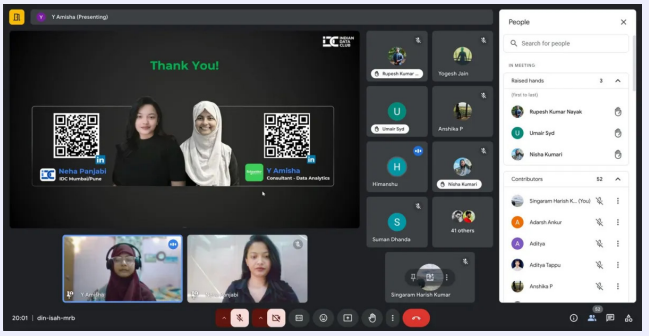
Get unlimited doubt-clearing support through our active Discord community. This dedicated platform allows you to interact with fellow learners and mentors, ensuring your questions are answered promptly and fostering collaborative learning throughout your journey.

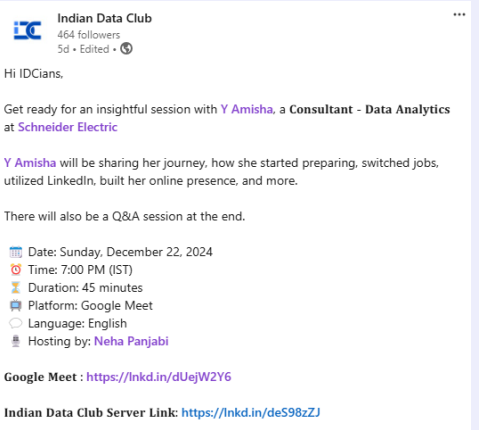




LEARNING COMMUNITY INDIAN DATA CLUB (IDC)

Join our vibrant new community, the Indian Data Club (IDC), designed to enhance your learning experience. Participate in regular meetups, engage in weekly quizzes, and attend live sessions to stay connected, learn collaboratively, and grow with like-minded individuals.





PROJECT PORTFOLIO WEBSITE

Having a ***PROJECT PORTFOLIO WEBSITE*** is a fantastic way to stand out from the crowd and to show the proof of your work. This is the right way to convince the hiring managers to call you for an interview especially if you are a fresher or someone from a non-technical background. We advised our learners to create a portfolio website but noticed that they found it challenging to create a compelling portfolio website from scratch due to the lack of proper tools in the market.

Hence, we ended up creating a feature to automate the ***PORTFOLIO WEBSITE*** within our bootcamp so our learners can focus on practice and interview preparation.To meet various preferences and needs, we now offer different themes for portfolio websites. Choose the style that best represents your professional image and effectively showcases your work.

This is how your landing page would look like

Business Insight 360 Dashboard for Various Department of AtiQ Hardwares

AtliQ Hardware faces challenges with Excel for data analysis, causing losses in Latin America. Our aim: implement an advanced analytics solution for efficient data analysis and informed decision-making.

View Project Engagement | View Project on GitHUB

Dashboard Home Page, all the views buttons will be available. Users will land on a specific view page by clicking the button

Project Details

AltiQ Hardware is a company which has grown vastly in recent years, and opened business all over the globe.
It is a company which sells, computers and computer accessories through three mediums/channel

- Retailers
- Direct
- Distributors

Recently the company has faced a unforeseen loss by opening store in America based on the surveys,
intuition and some excel analysis and also the company's competitors has handful of analytics team to perform
analysis and make data driven decision. So, the AltiQ hardware has no other option other than building their analytics team
for data driven insights and decisions in the future to survive better in the industry.

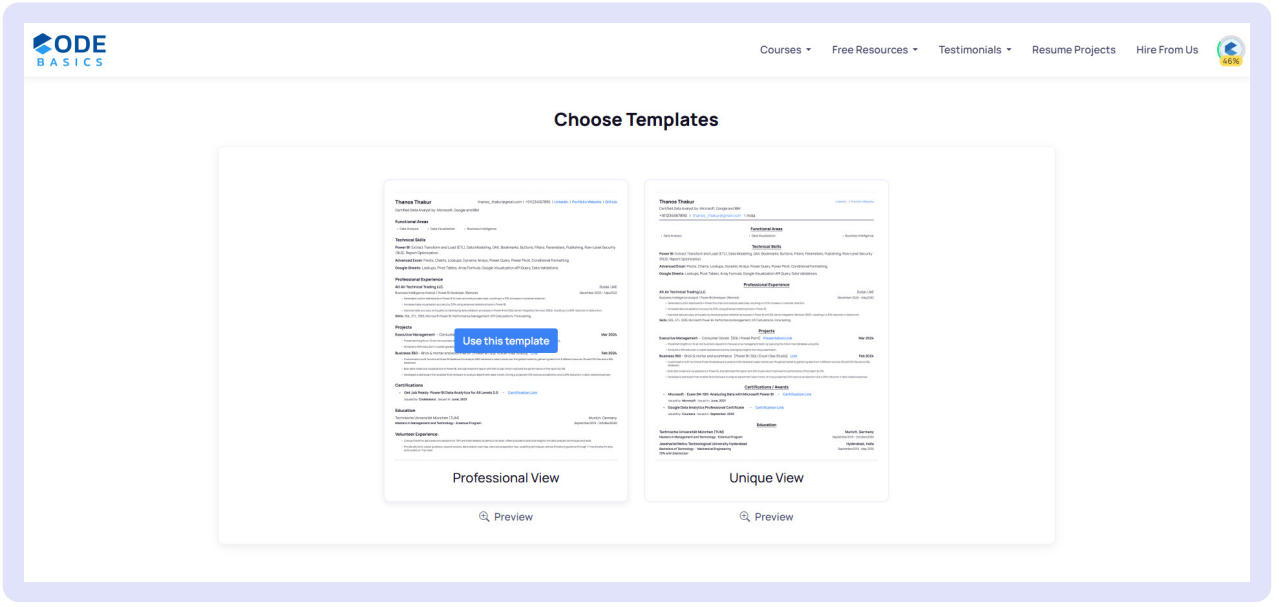
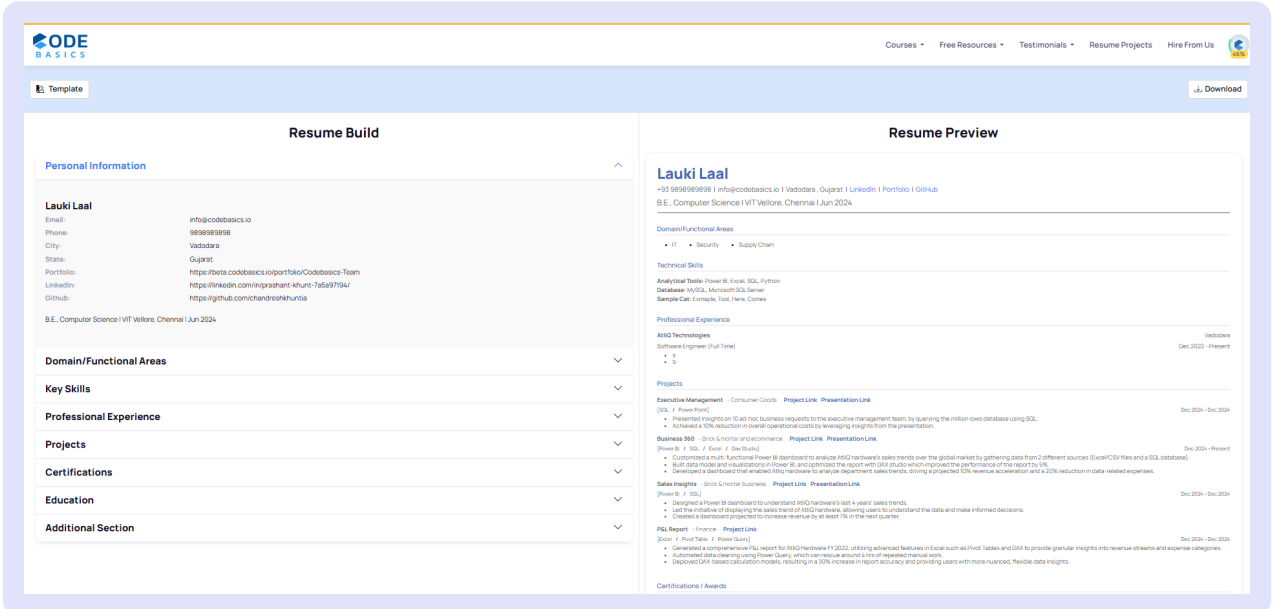
ATS RESUME BUILDER

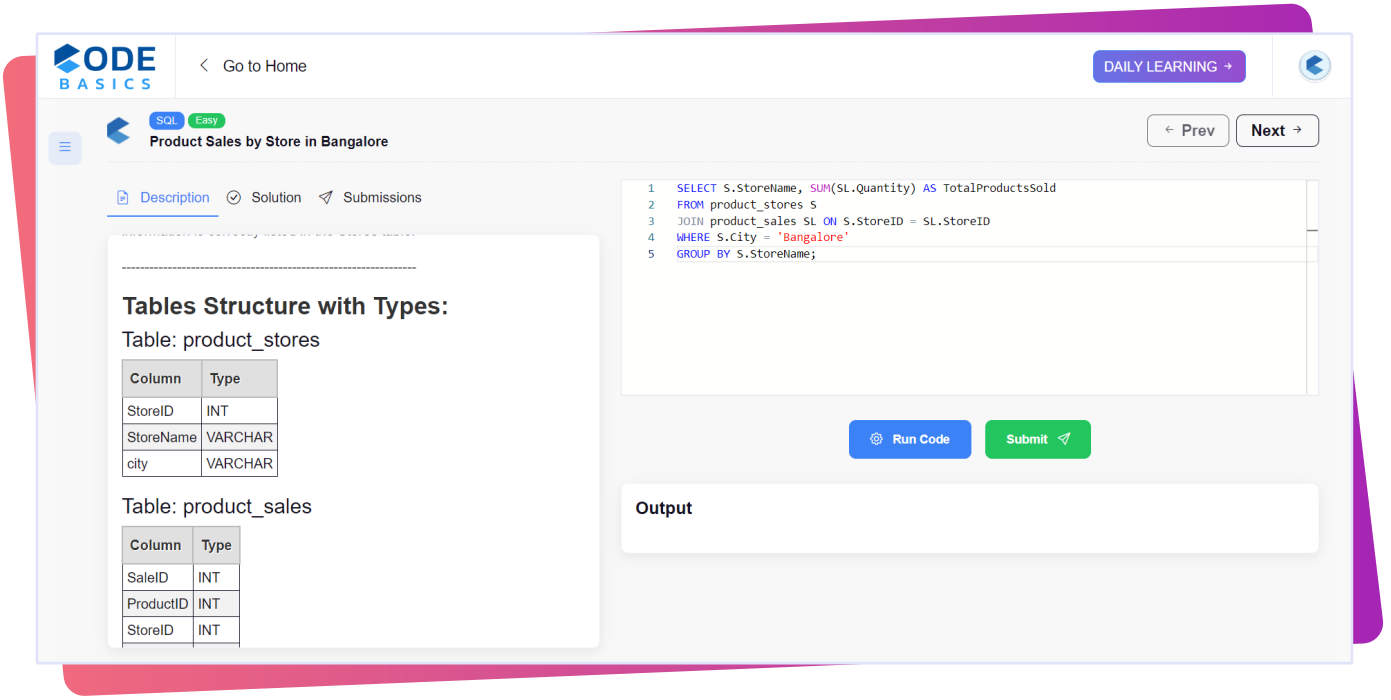
Our ATS Resume Builder helps you create professional resumes effortlessly. Enter your details, and the tool formats them in a structured way. It ensures your resume looks clear and well-organized. Save time and focus on applying for jobs. Perfect for showcasing your skills effectively.





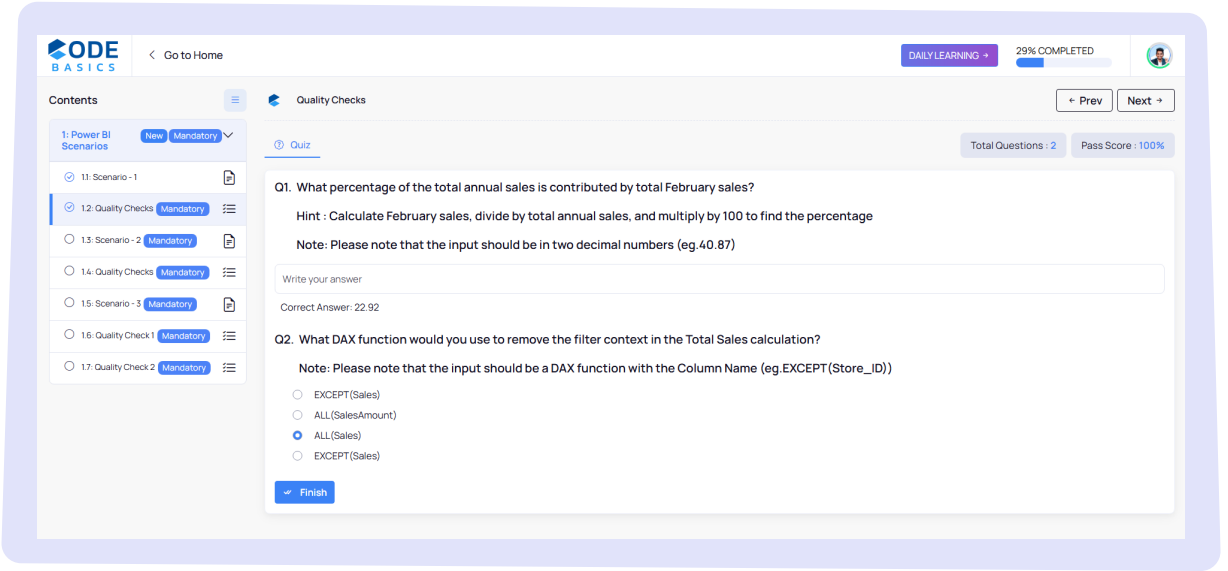
PRACTICE ARENA SQL CONSOLE

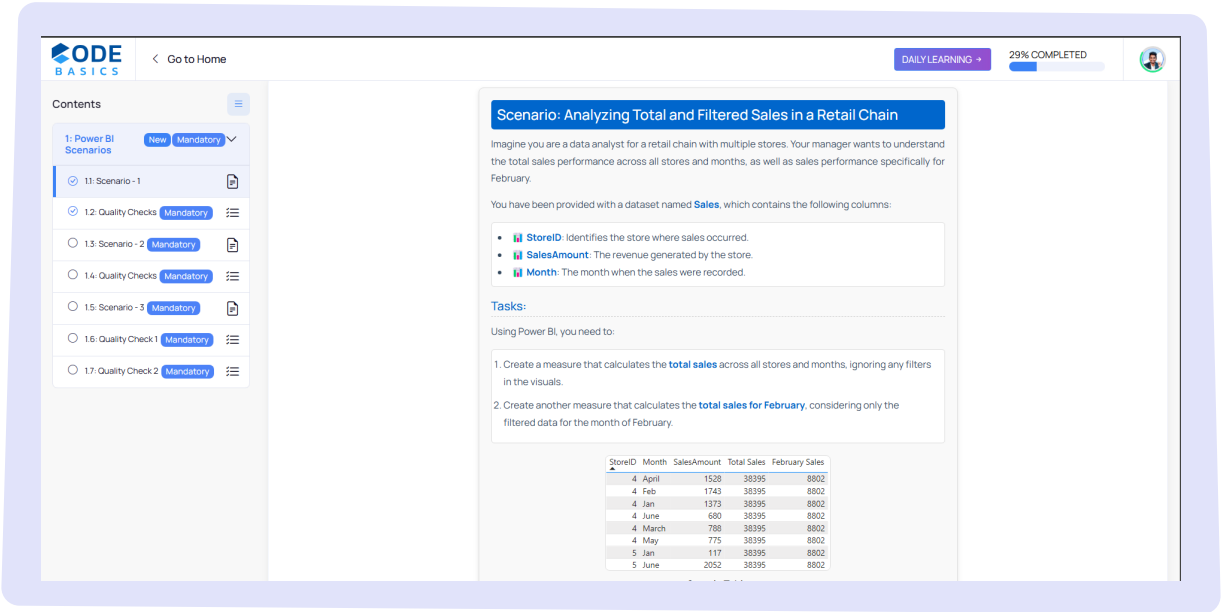
To enhance your learning experience, we've integrated a Practice Arena with an SQL console directly into our platform. This means you can start improving your SQL skills immediately—no software installation is required. Simply read the problem statement, familiarize yourself with the table structure along with the sample inputs and outputs, write your SQL query, and test it right on the website. This feature is designed to provide a seamless and straightforward practice environment, making it easier for you to learn SQL through continuous practice.



DAX SCENARIOS

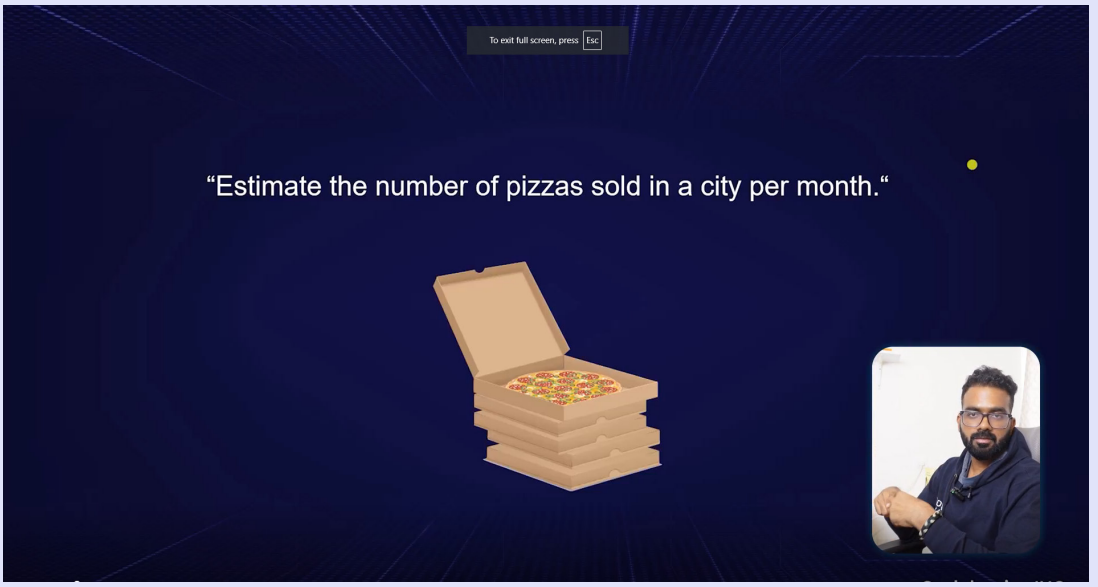
Just like the real world! Enhance your DAX skills with scenarios, get a PBIX file, solve tasks, and check your answers to see if you nailed it.

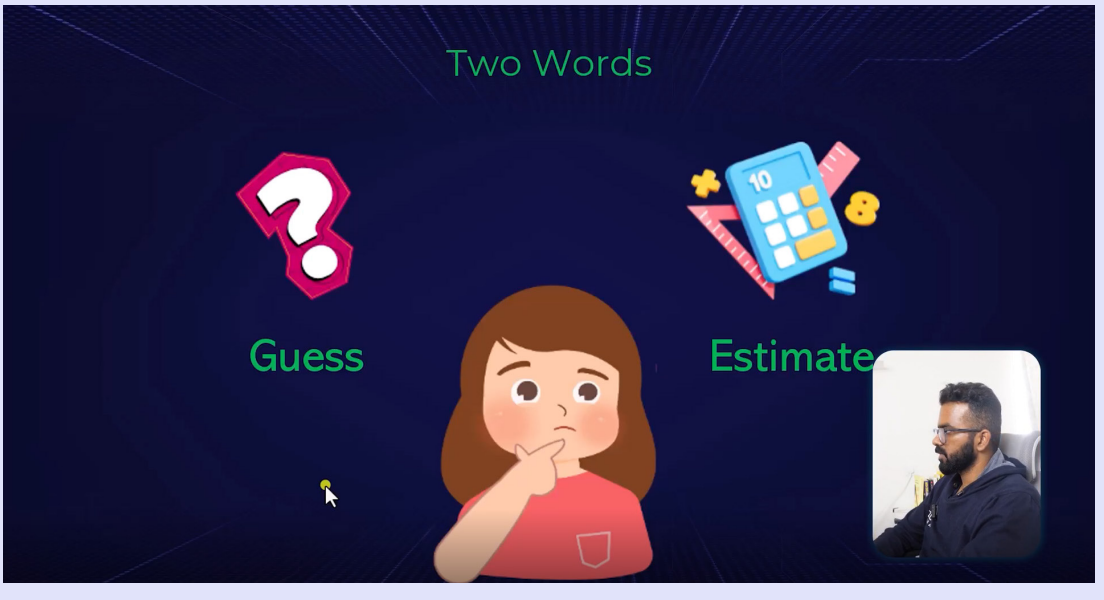




GUESSTIMATES

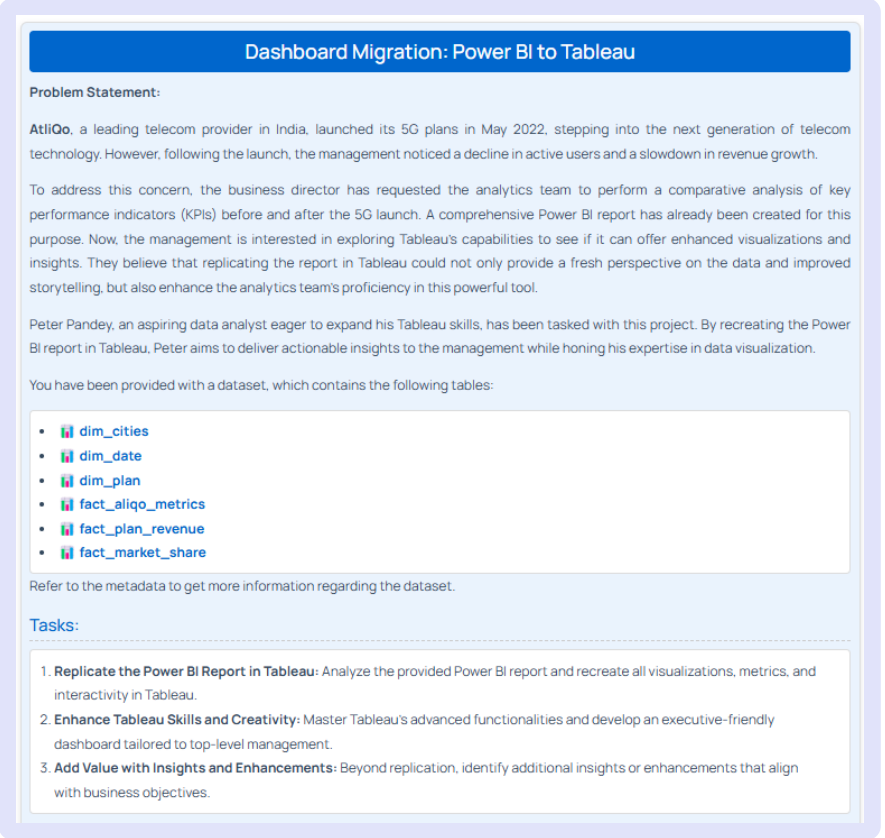
What if I told you that you don't need to give an exact answer? Guesstimate questions in interviews are designed to test your thought process, not just to get the right answer. Learn how to approach these questions using two techniques—top-down and bottom-up—and practice with real examples.





UNGUIDED PROJECTS WITH SUPPLEMENTS

Extra projects for extra learning! Step into real-world scenarios with our unguided projects—no tutorials, just you and the data. Work on messy datasets, collaborate across databases, and build impactful dashboards in tools like Power BI, Tableau etc., Designed to push your problem-solving skills and foster independence, these projects go beyond the course to help you stand out.



Dashboard Migration: Power BI to Tableau

Problem Statement:

AtliQo, a leading telecom provider in India, launched its 5G plans in May 2022, stepping into the next generation of telecom technology. However, following the launch, the management noticed a decline in active users and a slowdown in revenue growth.

To address this concern, the business director has requested the analytics team to perform a comparative analysis of key performance indicators (KPIs) before and after the 5G launch. A comprehensive Power BI report has already been created for this purpose. Now, the management is interested in exploring Tableau's capabilities to see if it can offer enhanced visualizations and insights. They believe that replicating the report in Tableau could not only provide a fresh perspective on the data and improved storytelling, but also enhance the analytics team's proficiency in this powerful tool.

Peter Pandey, an aspiring data analyst eager to expand his Tableau skills, has been tasked with this project. By recreating the Power BI report in Tableau, Peter aims to deliver actionable insights to the management while honing his expertise in data visualization.

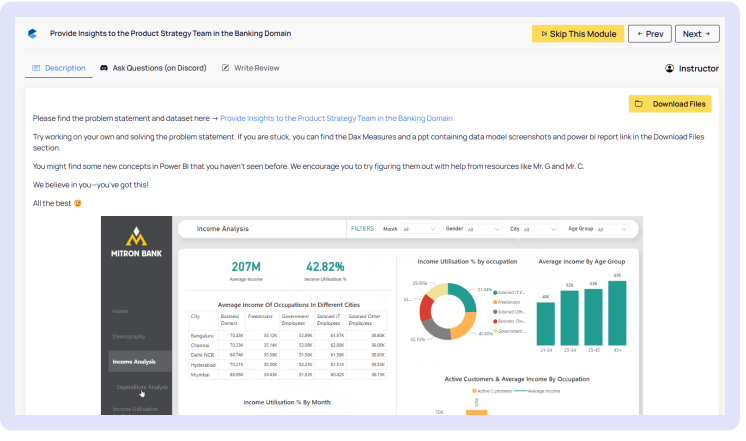
You have been provided with a dataset, which contains the following tables:

- dim_cities
- dim_date
- dim_plan
- fact_aliqo_metrics
- fact_plan_revenue
- fact_market_share

Refer to the metadata to get more information regarding the dataset.

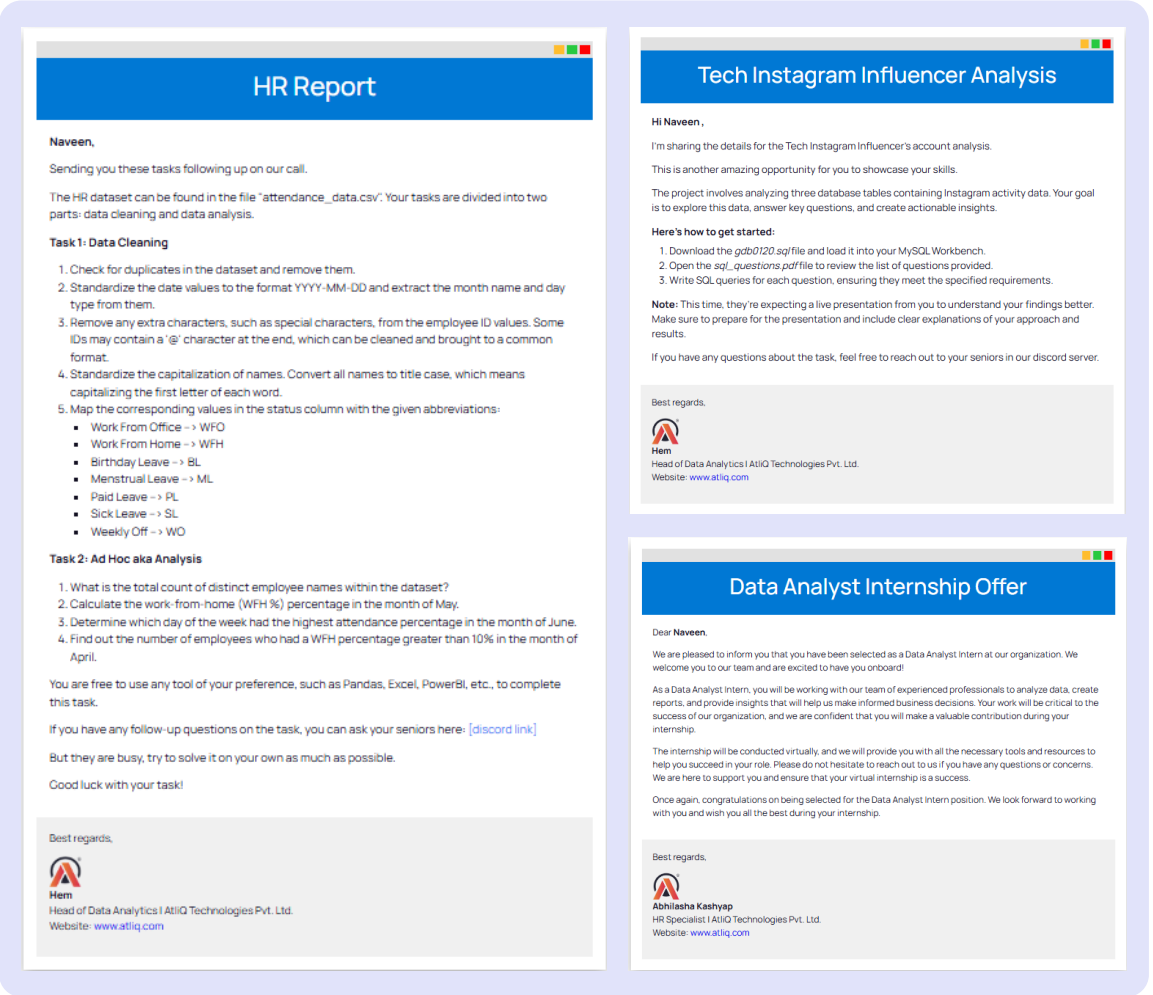
Tasks:

1. **Replicate the Power BI Report in Tableau:** Analyze the provided Power BI report and recreate all visualizations, metrics, and interactivity in Tableau.
2. **Enhance Tableau Skills and Creativity:** Master Tableau's advanced functionalities and develop an executive-friendly dashboard tailored to top-level management.
3. **Add Value with Insights and Enhancements:** Beyond replication, identify additional insights or enhancements that align with business objectives.



VIRTUAL INTERNSHIPS

In our Virtual Internships, you'll gain hands-on experience in data analytics using Power BI, SQL, Excel, and Python. You'll explore Kanban and scrum project management and master data cleaning, and transformation. Understanding requirements and presenting complex analysis concisely are key focuses. With a problem-solving mindset, you'll be ready to tackle any data challenge and make a meaningful impact.



HR Report

Naveen,

Sending you these tasks following up on our call.

The HR dataset can be found in the file "attendance_data.csv". Your tasks are divided into two parts: data cleaning and data analysis.

Task 1: Data Cleaning

1. Check for duplicates in the dataset and remove them.
2. Standardize the date values to the format YYYY-MM-DD and extract the month name and day type from them.
3. Remove any extra characters, such as special characters, from the employee ID values. Some IDs may contain a '@' character at the end, which can be cleaned and brought to a common format.
4. Standardize the capitalization of names. Convert all names to title case, which means capitalizing the first letter of each word.
5. Map the corresponding values in the status column with the given abbreviations:
   - Work From Office --> WFO
   - Work From Home --> WFH
   - Birthday Leave --> BL
   - Menstrual Leave --> ML
   - Paid Leave --> PL
   - Sick Leave --> SL
   - Weekly Off --> WO

Task 2: Ad Hoc aka Analysis

1. What is the total count of distinct employee names within the dataset?
2. Calculate the work-from-home (WFH %) percentage in the month of May.
3. Determine which day of the week had the highest attendance percentage in the month of June.
4. Find out the number of employees who had a WFH percentage greater than 10% in the month of April.

You are free to use any tool of your preference, such as Pandas, Excel, PowerBI, etc., to complete this task.

If you have any follow-up questions on the task, you can ask your seniors here: [discord link]

But they are busy, try to solve it on your own as much as possible.

Good luck with your task!

Best regards,

Tech Instagram Influencer Analysis

Hi Naveen ,

I'm sharing the details for the Tech Instagram Influencer's account analysis.

This is another amazing opportunity for you to showcase your skills.

The project involves analyzing three database tables containing Instagram activity data. Your goal is to explore this data, answer key questions, and create actionable insights.

Here's how to get started:

1. Download the *gdb0120.sql* file and load it into your MySQL Workbench.
2. Open the *sql_questions.pdf* file to review the list of questions provided.
3. Write SQL queries for each question, ensuring they meet the specified requirements.

Note: This time, they're expecting a live presentation from you to understand your findings better. Make sure to prepare for the presentation and include clear explanations of your approach and results.

If you have any questions about the task, feel free to reach out to your seniors in our discord server.

Best regards,

Hem

Data Analyst Internship Offer

Dear **Naveen**,

We are pleased to inform you that you have been selected as a Data Analyst Intern at our organization. We welcome you to our team and are excited to have you onboard!

As a Data Analyst Intern, you will be working with our team of experienced professionals to analyze data, create reports, and provide insights that will help us make informed business decisions. Your work will be critical to the success of our organization, and we are confident that you will make a valuable contribution during your internship.

The internship will be conducted virtually, and we will provide you with all the necessary tools and resources to help you succeed in your role. Please do not hesitate to reach out to us if you have any questions or concerns. We are here to support you and ensure that your virtual internship is a success.

Once again, congratulations on being selected for the Data Analyst Intern position. We look forward to working with you and wish you all the best during your internship.

Best regards,

Abhilasha Kashyap
HR Specialist I AtliQ Technologies Pvt. Ltd.
Website: www.atliq.com

During weeks 3 and 4 of the internship, you will work on client projects in the insurance and telecom domains, analyzing data and presenting your insights to stakeholders.

Virtual Internship Primer (Optional)

During weeks 3 and 4 of the internship, you will work on client projects focused on YouTube and Instagram analysis as part of Social Media Analytics, where you will analyze data and present your insights to stakeholders.

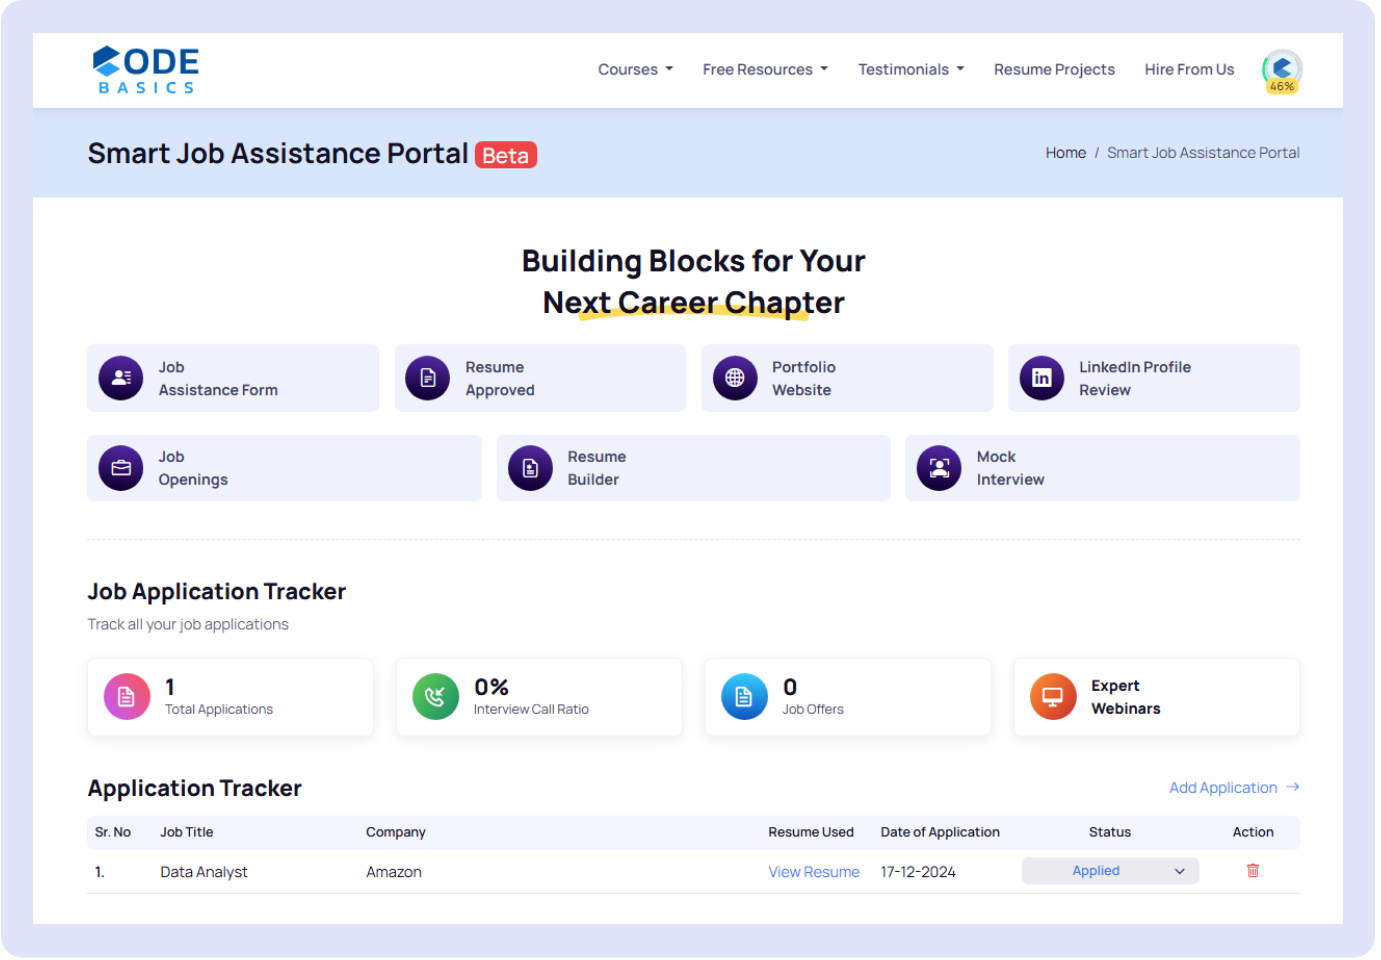
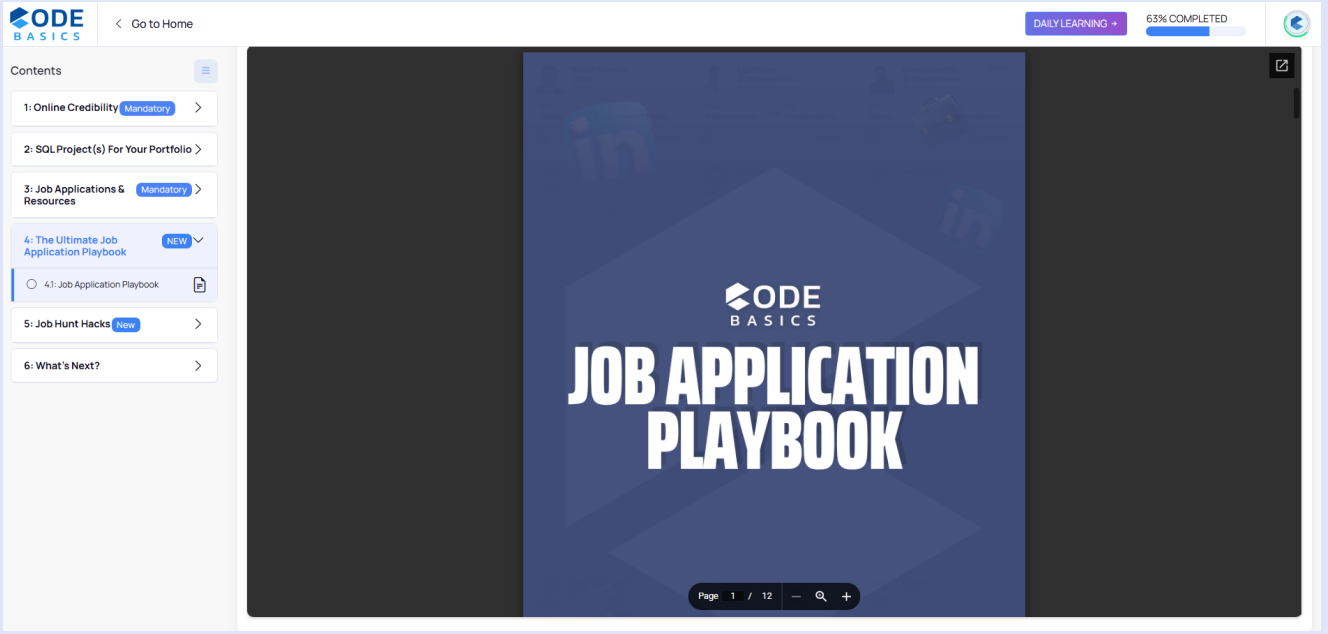
Through this job portal, you can review and optimize your resume, project portfolio, and LinkedIn profile with the assistance of a dedicated talent management team. You can also find relevant job openings and receive comments from the talent management team, such as which keywords to use and which projects to discuss. Additionally, there is space to add and track applications. This portal will continuously help you upgrade to ensure we assist you in the best possible way.

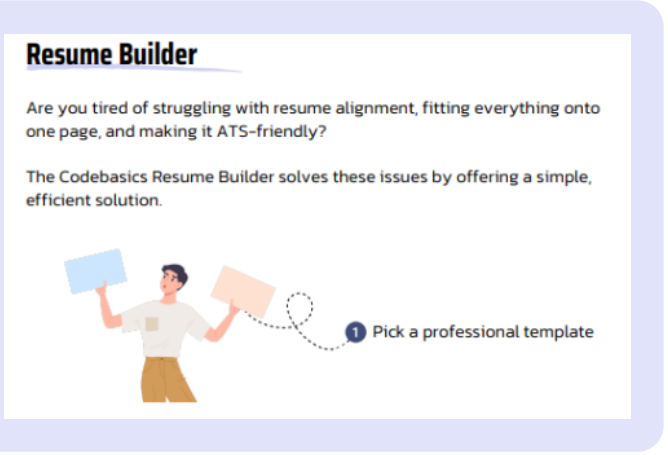


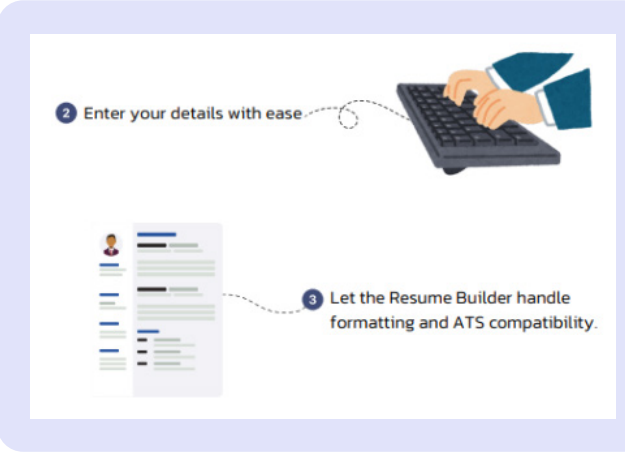
JOB APPLICATION PLAYBOOK

Spending just 20-30 minutes with this playbook can save you at least 30 days of effort in your journey.

Crack the game of applying for jobs with our Playbook! From comprehensive steps to actionable tips, learn strategies that truly work and boost your chances of landing an interview call.

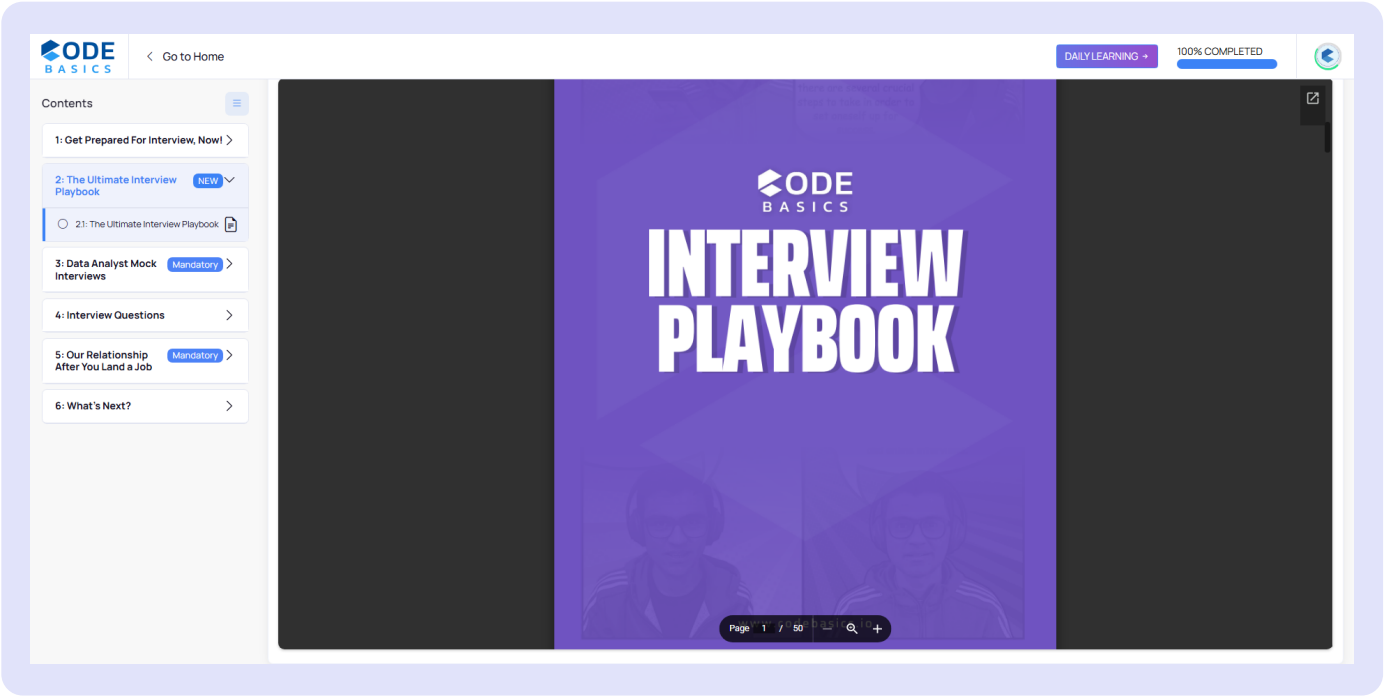


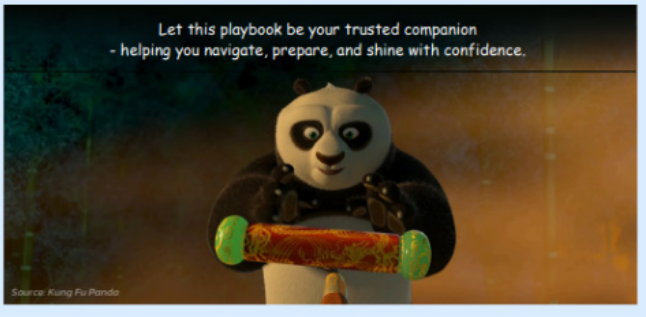




INTERVIEW PLAYBOOK

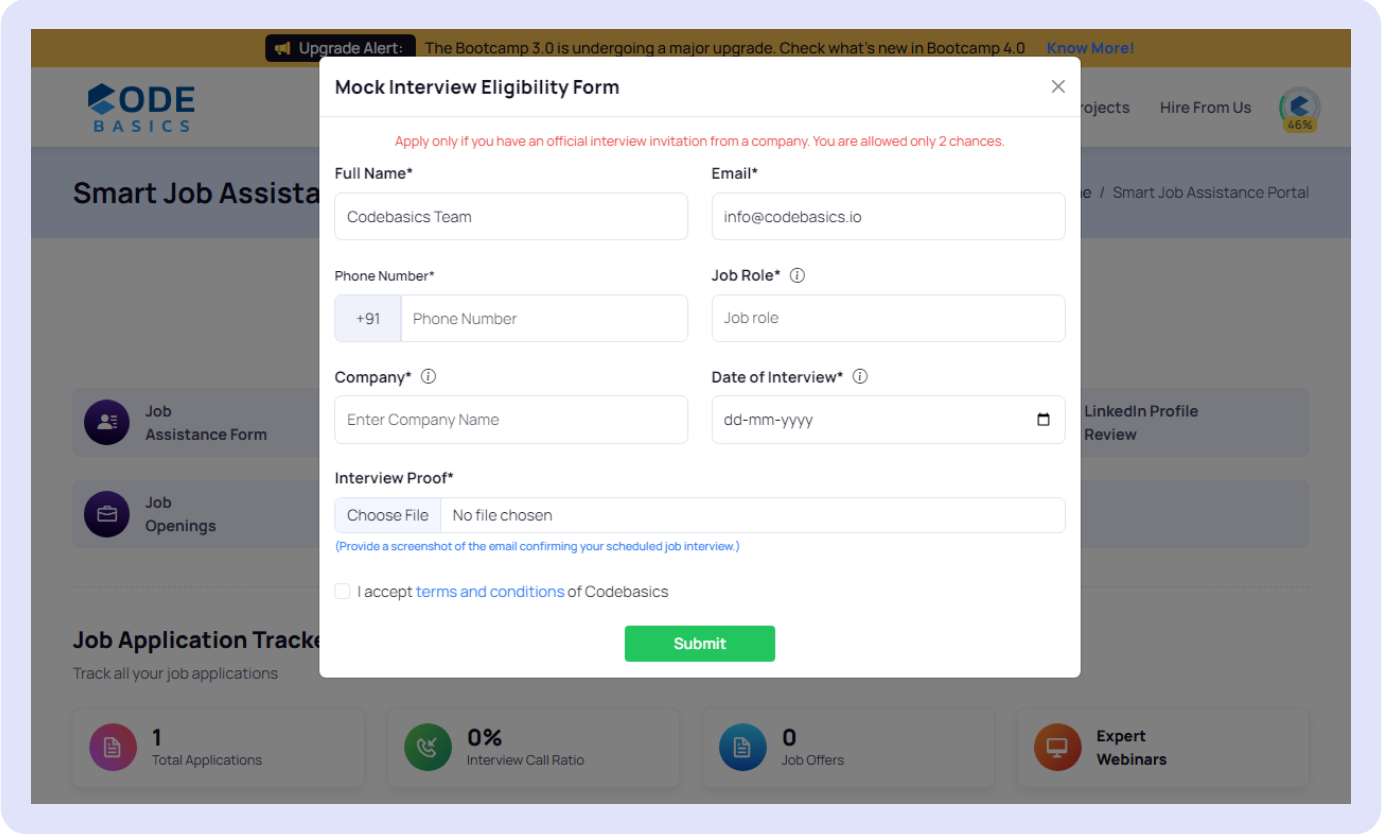
Ace your interviews with our comprehensive playbook! Follow a step-by-step guide to prepare for interviews, present your best self, clarify questions with the interviewer, and confidently handle technical queries. Learn how to showcase your skills effectively and leave a lasting positive impression. Your ultimate guide to mastering interviews with confidence.





MOCK INTERVIEW

Get two personalized 1-on-1 mock interview sessions upon confirming your actual interview schedule. Receive tailored feedback to refine your responses and boost your confidence. Practice common and role-specific questions with industry experts to prepare effectively for real interviews. Build confidence and ace your next interview with ease.



TESTIMONIALS

Krishna Prasad
Data Analyst

Hi Dhaval Sir, My writing skills are not good so i am unable to express much in words about this course. You have put lot of effort to design this course, and it is really worth it. Course in really good it has contained almost everything to become data analyst. Please continue to guide us in future. Thanks Krishna Prasad

Aravind Kumar Yedida
Data Engineer

As a recent postgraduate, I always worry about whether AI will replace my chosen career in data analysis. My initial goal was to build a career in data analytics, but I've frequently wondered if I'm genuinely suited for it. I got answers from this boot camp by watching demo videos. So I joined this boot camp and watched demo videos first to learn how to build a career in data analytics. From the beginning, the video content was engaging, clear, and easy to understand. I am excited and I am interested in practicing more with datasets. Thanks to the team for their support, and for helping us to build a stronger foundation career and confidence in my path.

Keerthi Arigela

i am a homemaker looking to restart my career after a long gap. When I began the Data Analysis Bootcamp course by Codebasics, I had minimal knowledge of Excel. However, the step-by-step learning approach and the practical exercises provided in the course helped me build my confidence. Dhaval Sir's teaching is exceptional—he explains concepts so clearly that anyone can understand them with ease. I am truly excited to continue learning more advanced topics in this course.

I recently joined the Data Analytics course by Codebasics, taught by Dhaval Patel, and it has been an excellent experience. The course is structured to simplify complex topics with clear explanations and real-world examples. Hands-on projects and assignments have greatly improved my confidence in tools like Excel, Power BI, and Python. The community support and doubt-clearing sessions are highly effective, ensuring no learner feels stuck. I highly recommend this course to anyone looking to build practical data analytics skills.

FROM FOUNDER'S DESK

Hello, I'm Dhaval Patel, and I want to share how and why I started the Codebasics YouTube channel. It all began during one of the darkest periods of my life. In **2011,** while working for Bloomberg, I was diagnosed with **Ulcerative colitis,** a painful autoimmune disease. Despite trying numerous treatments, my health continued to decline. By **2015,** I felt hopeless and **constantly in pain.**

During this time, I stumbled upon a life-changing quote:

> ***"Life is 10% what happens to you and 90% how you react."***

Determined to shift my focus and find joy, I sought an activity that I enjoyed and that allowed me to help others. **Given my teaching abilities and inclination to share knowledge, I started the Codebasics YouTube channel.** Teaching became an outlet for me, enabling me to make a positive impact and share my expertise.

With each "Thank you" comment I received on my videos, my sense of purpose and will to live grew stronger. Over time, the Codebasics community flourished, and we now have over **1.33 Million+ subscribers** on YouTube and more than **44K+ paid learners** I've left my full-time job in the year 2022 to dedicate myself to Codebasics fully. My goal is to continue sharing my knowledge and creating a **positive impact** through this platform.

Use my story as to remind yourself that life is not always going to be easy but you can rise above that and make the world a better place to live for yourself and others.
